Dear Mira Borukhin,

A full APIS is required for travel to Saudi Arabia. Please take a look at our reminder for Downtown Travel

Full APIS required for travel to Saudi Arabia

Saudi Arabian Airlines (SAUDIA) would like to remind its agency partners of the need to fill out all APIS (Advance Passenger Information System) fields as required by the government of Saudi Arabia, as follows:

1. Travel document type (passport)
2. Travel document number
3. Travel document expiry date
4. Issuing state of travel document
5. Nationality
6. Family name
7. First name
8. Given name (if available)
9. Gender (M/F)
10. Date of birth.

The policy requires ticketing agencies to enter full passport information correctly through APIS when creating PNRs and before issuing e-tickets. The above fields are mandatory in the SSR DOCS entry for each passenger in the PNR.

More details are available at: (http://saudia.com/travelagencies.

You may also contact your Saudia Account Manager or Americas Sales Support Group (below) for further information or clarifications. Thank you very much.
